RE: RIN 1219-AB64 May 16, 2011

To whom it May Concern,

I am Don Hayes Sr. I live at 2371 Chanvin Dr. Apt. A Lexington, Ky 40517 and I worked for Arch Mineral Coal their office is in St. Louisa Mourse I worked for over 30 years as a heavy Equ. operater and I never refused no over time and I could run any pice of Equ. they have because I had 3 kids in College at the same time and I wanted a better life for them.

It is to late for me about black lung or Road dust on my lungs because I have see many doctors and they tell me there is nothing no body can do for me because of the Roct dust on my lungs, but I use oxygen to help me breathe 24 hours a day and I will as long as I live even when I take a shower, But the young miners might be helpe if MSHA's could help or make the coal Companys do a better job and give some classes one day every 6 months or so and tell the young miners

2011 MAY 23 P 2:

(2)

how danger the dust really is. I know we need the Coal and, but I am living profed that your health is Emportment as well, but with a 8th grade Education you are lucky to fine a job of anything.

I hope you will be able to help the young miners.

Thank you

Don Hayes Sr.
