NOTES

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all flood-prone features outside Special Flood Hazard Areas. The community map repository should be consulted for possible updated or additional flood hazard information.

To obtain more detailed hydrologic and hydraulic information or flood elevations, floodway locations, flood insurance rate zone boundaries, or boundaries of areas of special flood hazard, use the flood elevations shown on this map for property purposes in individual flood determinations.

Coastal base flood elevations apply only landward of Mean High Tide, and inland elevations of coastal areas, flood elevations may also differ significantly from those developed by the National Weather Service for purposes of coastal flood warning.

Communities participating in the National Flood Insurance Program (NFIP) adopt and enforce floodplain management ordinances that meet NFIP criteria. These criteria are set forth in Title 44 of the Code of Federal Regulations, Subchapter B, Part 60.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Base elevations of the floodways were computed at cross-sections and interpolated between cross-sections.
