General Comment

Why are we still importing oil and gas and mining minerals ?? Energy dept date 7/31/2017 shows we are importing oil products from many countries; import in April 2017 was 307,314 thousand barrels then increased to 329,468 thousand barrels in month of May. One of the noticeable was from Russia april import 9,231 thousand barrels, then in May 2017 increased to 12,425 thousand barrels, Why are we hurting American Energy industry ? Mexico went from april import of 20,392 thousand barrels to 25,100 barrels in May 2017, why are we hurting American with regulations. America has more oil and gas than any other nation yet we have more regulations against our middle class workers in mines and oil and gas. should be exporting, rules are backwards
