

2005 SUMMER PROP/REDZONE SPECIAL SAFETY INITIATIVE

“BEST PRACTICES”

- **Be alert for changing roof conditions.**
- **Install additional roof supports where necessary.**
- **Conduct a thorough visual examination of the roof, face, and ribs immediately before any work is started and thereafter as conditions warrant.**
- **In areas where geological changes in roof strata are present additional safety precautions should be applied. Example: bolt straps across multiple cracks.**
- **Limit the unnecessary presence of other miners at or near the pillar areas.**
