NOTE: 1978-1982 data not available in the MSIS

Data source (for 1978-1982):

All Coal: <http://arlweb.msha.gov/ACCINJ/BOTHCL.HTM>

All MNM: <http://arlweb.msha.gov/ACCINJ/ALLMETAL.HTM>

NOTE: First "At A Glance" report published in 2008. The 1990, 1995, and 2000-2015 data are based on historical publications. The rest of years is pulled by MSIS.

*Values are all inclusive of operator and contractor employees.

1-Reported injuries per 200,000 hours worked.

2-Total Mining Area Time includes: On-site Inspection Time (M/NM), MMU Pit Time (Coal), Outby Area Time (Coal), Surface Area Time (Coal), Citation/Order writing On-Site. On-site inspection hours represent hours entered by Authorized Representatives of the Secretary (AR) for certain inspection activities and task codes.

3-Citations and orders are those not vacated.

4-Citations and Orders issued, and Dollar Amount Assessed, are based on issue date. Therefore, citation counts and dollars assessed can fluctuate, upwards or downwards, depending on the date information was pulled. For example, numbers tend to fluctuate downwards when an issued citation is either conferenced or contested and is subsequently vacated. Dollars assessed can fluctuate upwards when there is a lag time between the issuance date and the assessed date.

NOTE: 1978-1982 data not available in the MSIS

Data source (for 1978-1982):

All Coal: <http://arlweb.msha.gov/ACCINJ/BOTHCL.HTM>

NOTE: First "At A Glance" report published in 2008. The 1990, 1995, and 2000-2015 data are based on historical publications. The rest of years is pulled by MSIS.

*Values are all inclusive of operator and contractor employees.

1-Reported injuries per 200,000 hours worked.

2-Total Mining Area Time includes:MMU Pit Time (Coal), Outby Area Time (Coal), Surface Area Time (Coal), Citation/Order writing On-Site. On-site inspection hours represent hours entered by Authorized Representatives of the Secretary (AR) for certain inspection activities and task codes.

3-Citations and orders are those not vacated.

4-Citations and Orders issued, and Dollar Amount Assessed, are based on issue date. Therefore, citation counts and dollars assessed can fluctuate, upwards or downwards, depending on the date information was pulled. For example, numbers tend to fluctuate downwards when an issued citation is either conferenced or contested and is subsequently vacated. Dollars assessed can fluctuate upwards when there is a lag time between the issuance date and the assessed date.

NOTE: 1978-1982 data not available in the MSIS

Data source (for 1978-1982):

All MNM: <http://arlweb.msha.gov/ACCINJ/ALLMETAL.HTM>

NOTE: First "At A Glance" report published in 2008. The 1990, 1995, and 2000-2015 data are based on historical publications. The rest of years is pulled by MSIS.

*Values are all inclusive of operator and contractor employees.

**MNM completed 16,602 regular inspections in 2015. Primarily because of the number of intermittent operations in MNM, its inspectors attempted but could not conduct another 703 regular inspections. MNM conducted 100% of mandatory inspections at mines available for inspection in 2015.

1-Reported injuries per 200,000 hours worked.

2-Total Mining Area Time includes: On-site Inspection Time (M/NM), Citation/Order writing On-Site. On-site inspection hours represent hours entered by Authorized Representatives of the Secretary (AR) for certain inspection activities and task codes.

3-Citations and orders are those not vacated.

4-Citations and Orders issued, and Dollar Amount Assessed, are based on issue date. Therefore, citation counts and dollars assessed can fluctuate, upwards or downwards, depending on the date information was pulled. For example, numbers tend to fluctuate downwards when an issued citation is either conferred or contested and is subsequently vacated. Dollars assessed can fluctuate upwards when there is a lag time between the issuance date and the assessed date.

CONTRACTORS (At A Glance Data CY 1978-2015)

Mine Contractors	2009	2010	2011	2012	2013	2014	2015
