***Exhibits retained by counsel**

1 MR. KOERBER: My name is Barry
2 Koerber. I'm an Assistant Attorney
3 General.

4 I'm assigned to the West Virginia
5 Office of Miners' Health Safety and
6 Training's UBB Accident Investigation
7 Committee.

8 Today is January 6th, 2011. It's
9 about 1:15.

10 We have three different teams
11 present at the table that will be asking
12 questions. And at this point in time, I'd
13 ask everybody to identify themselves.

14 MR. TUCKER: Bill Tucker with the
15 West Virginia Office of Miners' Health
16 Safety and Training.

17 MR. O'BRIEN: John O'Brien with
18 the West Virginia Office of Miners' Health
19 Safety and Training.

20 MR. GODSEY: John Godsey, MSHA.

21 MS. HAMPTON: Pollyanna Hampton,
22 Solicitor's Office with the Department of
23 Labor.

24 MR. MCGINLEY: Patrick McGinley

1 with the Governor's Independent
2 Investigation team.

3 MR. KOERBER: Mr. Hodges.

4 THE WITNESS: Yes.

5 MR. KOERBER: The court reporter
6 here will be transcribing everything
7 that's said here today, and she'll also be
8 the person that swears you in shortly.

9 THE WITNESS: Can I say one thing
10 before you go?

11 MR. KOERBER: Yeah.

12 THE WITNESS: Drop the S off --

13 MR. KOERBER: Mr. Hodge.

14 THE WITNESS: Yes. I don't have
15 an S on --

16 MR. KOERBER: I apologize.

17 THE WITNESS: That's okay.

18 MR. KOERBER: The court reporter,
19 there's a few ground rules for the court
20 reporter, to make her life much more
21 easier. Okay?

22 One, please wait until the
23 question is asked before you begin to
24 answer. And I would ask that all of our

1 interview people wait until Mr. Hodge
2 answers the question before you begin your
3 next question so that we don't have people
4 talking over one another. Okay?

5 Also, you can't nod your head up
6 and down and side to side to indicate yes
7 and no, because that doesn't show up on
8 the transcript. You need to say yes or
9 no. Uh-huh, huh-uhs don't work either.
10 It's got to be yeses and nos.

11 Also, there may be a point in
12 time where we're dealing with something on
13 the map, and it's so easy for all of us
14 here just to point at something and say,
15 "I was here and then I went over there."
16 But for purposes of the court reporter, we
17 would ask that you try to identify where
18 exactly you are on the map so that if
19 somebody is reading this six months down
20 the road, they'll know where "here" and
21 "there" was. Okay?

22 Also, the court reporter is
23 working for the Office of Miners' Health
24 Safety and Training, and they are doing

1 this work on a three-day turnaround, three
2 business days. So the transcript that
3 comes from today's interview will be
4 prepared and ready by next Wednesday
5 morning, and that would be Wednesday of
6 next week.

7 In the event you desire to read
8 your transcript for accuracy and if you
9 find any errors while reading that
10 transcript, you can make any corrections
11 on an errata sheet.

12 If you would like to do that, I'm
13 going to give you a business card from
14 Johnny Jackson & Associates. They have a
15 business office in Charleston, West
16 Virginia, and you can call and set up a
17 time and an appointment where you go into
18 their office and they'll provide you with
19 a conference room where you'll have
20 privacy and you can read and make whatever
21 changes you want on the errata sheet. The
22 only thing is, they won't let you take a
23 copy home with you. Okay? That's one of
24 the items that I'll give you here

1 MS. HAMPTON: And did you have
2 any questions for me about the content of
3 that letter?

4 THE WITNESS: No, ma'am.

5 MS. HAMPTON: I'd just like to
6 point out that at the end of the letter,
7 there's some contact information for Norm
8 Page. He is the leader of the Federal
9 Accident Investigation team, so if at any
10 time you have any other information you'd
11 like to share with the team or any
12 questions or anything, feel free to please
13 contact Norm.

14 THE WITNESS: Yes, ma'am.

15 MR. KOERBER: Would you please
16 swear in the witness.

17 RICK HODGE, WITNESS, SWORN

18 MR. KOERBER: There is one other
19 person in the interview room. I would ask
20 for the record -- in the audience of the
21 interview room -- that I'd ask that he
22 identify himself and who he is with for
23 purposes of the record.

24 MR. ADKINS: Phil Adkins, West

1 Virginia Office of Miners' Health Safety
2 and Training.

3 MR. KOERBER: And you got the
4 oath in. We're done. Okay.

5 MR. MCGINLEY: I should say for
6 the record as well that Suzanne Weise, who
7 is part of the Governor's Independent
8 Investigation team, will be coming in the
9 room shortly.

10 MR. KOERBER: Okay. Thank you.

11 Sir, would you please state your
12 full name for the record and spell your
13 last.

14 THE WITNESS: Richard Edward
15 Hodge.

16 MR. KOERBER: And you spell Hodge
17 as?

18 THE WITNESS: H-o-d-g-e.

19 MR. KOERBER: And what is your
20 address and telephone number?

21 THE WITNESS: (b) (7)(C)

22 (b) (7)(C)

23 (b) (7)(C).

24 MR. KOERBER: And your telephone

1 number?

2 THE WITNESS: Area code

3 (b) (7)(C)

4 MR. KOERBER: And are you
5 appearing here today as a result of
6 receiving a subpoena?

7 THE WITNESS: Yes.

8 MR. KOERBER: This is a copy of
9 that subpoena that I'm going to have
10 marked as Hodge Exhibit A (sic). And just
11 for the record, on the subpoena I have
12 Hodge with an S, and I apologize for that
13 error as well.

14 THE WITNESS: You ain't the first
15 one.

16 MR. KOERBER: Also, as Hodge
17 Exhibit B (sic), I'd like to have marked
18 the Affidavit of Service showing that you
19 were served on the 29th day of December.

20 So those two will be exhibits.

21 (Hodge Exhibit Nos. 1 & 2 marked
22 for identification.)

23 MR. KOERBER: Sir, do you have an
24 attorney with you here today?

1 THE WITNESS: No, sir.

2 MR. KOERBER: I notice we do have
3 another attorney at the table. I would
4 ask that he identify himself, his firm,
5 and who he represents.

6 MR. SILKWOOD: Eric Silkwood with
7 Allen Guthrie & Thomas here on behalf of
8 Performance Coal Company.

9 MR. KOERBER: Mr. Hodge, I'd also
10 like to give you a little bit of
11 information.

12 I'm going to give you a
13 memorandum for you to take home, West
14 Virginia Code 22A-1-22. It provides
15 protections to coal miners for
16 discrimination for participating in
17 interviews such as this.

18 In the event something would
19 occur, in this memorandum is the address
20 of the board of appeals. The board of
21 appeals is the administrative tribunal
22 that is charged with hearing
23 discrimination complaints. We have their
24 address. And should you feel that you've

1 been discriminated against, you can file
2 your complaint with the board of appeals.

3 Also, I would like to caution you
4 that the code only allows 30 days after
5 the discriminatory event occurs for you to
6 file your complaint with the board of
7 appeals.

8 I'm also going to give you the
9 Johnny Jackson & Associate Court
10 Reporter's business card, which I spoke of
11 earlier. Should you choose to set up an
12 appointment to go in and read your
13 transcript, this is who you call and this
14 is where you go.

15 And I'm also going to give you a
16 business card for Mr. Bill Tucker.

17 Mr. Bill Tucker is the lead investigator
18 for the Office of Miners' Health Safety
19 and Training. And should anything occur
20 later on that you think we need to know
21 about as far as if you think of anything
22 relevant, please contact Mr. Tucker.

23 Okay?

24 THE WITNESS: Yes.

1 MR. KOERBER: So let me give this
2 to you.

3 And one other thing that we're
4 mentioning to everybody that we call in
5 for interviews, potentially it's possible
6 that we may feel the need to call certain
7 people back. Whether one of those people
8 will be you or not, I have no idea, but I
9 just want you to be aware that that is a
10 potential scenario.

11 And with that, I'm going to turn
12 the interview over to Mr. O'Brien to start
13 the interview.

14 EXAMINATION

15 BY MR. O'BRIEN:

16 Q. First of all, Mr. Hodge, I would like to
17 thank you for coming in and helping us out. We
18 appreciate it.

19 How many years of total mining experience
20 do you have?

21 A. 28 and a half.

22 Q. And what mining certifications do you
23 possess or do you have?

24 A. I have got a West Virginia mine foreman's

1 card and also for training, training card, methane,
2 or a dust card. I think that's it.

3 Q. Could you give us a brief history of your
4 coal mine employment?

5 A. Well, I worked for Maben Energy for 16
6 years as an equipment operator.

7 And after they went bankrupt, I went to
8 Independence Coal, which was part of Massey, and
9 took a mine foreman job and worked my way up to
10 superintendent and been superintendent with Massey
11 for 12 years.

12 I left for two years and went to work for
13 Joe Phillips, put the mines in down at Josephine.

14 And after Joe sold out, then I left and
15 went back with Massey and wound up at Performance
16 the early part of 2007, I think. Somewhere around
17 in there.

18 Q. Are you currently employed?

19 A. I am.

20 Q. And where would that be?

21 A. Elk Run Coal.

22 Q. And what is your job?

23 A. Mine superintendent.

24 Q. And at which mine?

1 A. Actually, I'm currently off on sick leave,
2 so I don't -- that's my job title, but I actually
3 don't have a mines.

4 Q. Which mine did you work at last and when?

5 A. Sir, I don't remember the name of the
6 mines, but it was just for about a month and a half
7 before I went off sick in the latter part of July
8 and August of 2008.

9 Q. And it was one of the Elk Run's --

10 A. Yes.

11 Q. -- operations?

12 A. Yes.

13 There was a mine superintendent there.

14 All I was doing was helping him at the time.

15 Q. Where were you at before that?

16 A. At Performance.

17 Q. And which mine were you at there?

18 A. Upper Big Branch.

19 Q. And how long were you at Upper Big Branch,
20 from when to when roughly?

21 A. From the early, I think, January of 2007
22 up until July of 2008.

23 Q. And what was your job title or titles
24 during that period of time?

1 A. I was a general, or mine superintendent.

2 Q. Mine superintendent?

3 A. Yes.

4 Q. And you have been -- I apologize for
5 this. You've been off since July or August of
6 2008?

7 A. Yes.

8 Q. But you are still an employee of --

9 A. Yes.

10 Q. -- Massey?

11 A. Yes.

12 Q. Okay. Thank you.

13 What I'd like to focus on -- well, yeah,
14 what I'd like to focus in on now is when you were
15 at UBB, your time at UBB as superintendent.

16 Basically, what were your job duties?

17 A. Just oversee all the general everyday mine
18 practices and oversee all the workforce and
19 production. Just about everything, really.

20 Q. And who did you report to? Who was your
21 immediate supervisor at UBB?

22 A. When I first went or at the last? I mean,
23 I had two different supervisors at one time.

24 Q. Why don't you give us both if you don't

1 care?

2 A. When I first went to Upper Big Branch,
3 Craig Boggs was the president and James Hancock was
4 the general manager. And then it switched hands
5 and went to -- and I don't remember the dates or
6 even when it happened, but it was later went to
7 Chris Blanchard and Jason Whitehead.

8 Q. While at UBB, did you have any, did you
9 encounter any methane problems?

10 A. We did have some methane problems, yes,
11 sir.

12 Q. Could you elaborate some on that? Tell us
13 some of the problems.

14 A. Well, we had a borehole up -- I don't even
15 think it's on the map maybe. Yeah. Here. We had
16 a little bit of methane up around in here, but it
17 never was nothing too ...

18 MS. HAMPTON: You just pointed to
19 the map. This is a map of --

20 THE WITNESS: Yes.

21 MS. HAMPTON: -- the Upper Big
22 Branch Mine longwall area.

23 Now when you were pointing to
24 here, where precisely were you pointing on

1 the map? Could you describe in words the
2 location?

3 THE WITNESS: The abandoned gas
4 well.

5 MS. HAMPTON: The abandoned gas
6 well.

7 THE WITNESS: Yes.

8 Q. What did you call that part of the mine?
9 Do you remember?

10 A. North Mains, I think. I think that's what
11 we called it, the old North Mains section, which
12 was abandoned. Or it wasn't abandoned, but it was
13 just old works.

14 Q. And what kind of methane problems did you
15 encounter?

16 A. Never got no more than probably one
17 percent. Never got up any higher, but we kept the
18 ventilation up in there and kept everything
19 ventilated. We never, nothing more than one
20 percent.

21 Q. What was the most methane that you know of
22 that was ever detected at Upper Big Branch while
23 you were there?

24 A. One percent.

1 Q. One percent?

2 A. Yes.

3 Q. And where were the, roughly, where were
4 the mining operations taking place when you were
5 last there?

6 A. The headgate for the longwall had just
7 started and was not advanced very far. They was
8 only in, I'm going to say 10 breaks, maybe, maybe
9 more than that. But the tailgate, they were up in
10 there a pretty good ways.

11 Q. And that's of the current longwall
12 that's --

13 A. Yes.

14 Q. Okay. Thank you.

15 Would you describe UBB as a gassy mine
16 overall?

17 A. No, sir. I mean, it did liberate a little
18 bit of methane up around the well, but very seldom
19 did we ever pick anything up in the faces.

20 Q. And when you say "in the faces," is that
21 while you're mining?

22 A. Yes.

23 Q. What would the most do you recall picking
24 up while mining?

1 A. Probably two to three tenth percent.

2 Q. Was there a longwall operating at this
3 mine when you were superintendent?

4 A. No, sir.

5 Q. Were you aware of any methane inundations
6 prior to you coming to UBB?

7 A. Just rumors what I had heard.

8 Q. Could you help us out and tell us what you
9 heard?

10 A. Well, I was sent to --

11 I'll pass on that one. I don't know how
12 to answer that.

13 Well, just for the methane, just from the
14 rumors I heard from the past superintendents and,
15 you know, talking about hitting methane when the
16 longwall was there before. And I know they'd had
17 some dust problems and, you know, ventilation, just
18 rumors what I'd heard.

19 Q. Well, when you took over superintendent,
20 did you have to correct any dust problems or
21 methane problems?

22 A. No, not so much as methane problems, but
23 we did have some dust problems and a few little
24 problems.

1 Q. When you say "dust problems," were they,
2 where was the dust being generated? Was it on the
3 active sections, outby or?

4 A. Probably outby because of the, we put
5 down, we had to put down a lot of rock dust and try
6 to catch up with parts of the mines that had been,
7 I guess, special where they was building the
8 seals. You know, they was building seals whenever
9 I came there and sealing off the old longwall
10 panels.

11 Q. For my benefit, when you're saying "dust
12 problems," is that dust in the air or dust
13 accumulations along the mine floor --

14 A. Dust accumulation.

15 Q. -- roof and ribs?

16 A. Yes, dust accumulation.

17 Q. And that was throughout what part of the
18 mine, pretty much the whole mine or part of the
19 mine?

20 A. Pretty much all of it.

21 Q. Were you involved in any methane
22 ignitions --

23 A. No, sir.

24 Q. -- at UBB?

1 A. No.

2 Q. Is superintendent the only position you've
3 held at UBB?

4 A. Yes.

5 Q. Did anyone at Massey ever make a decision
6 dealing with ventilation or any other problem that
7 you disagreed with while you were superintendent?

8 A. Yeah. Yes. When we was building the
9 overcast for the airway for the -- actually, where
10 the section was moving to, they made a decision to
11 put up electric doors instead of taking the time to
12 put overcast in. I didn't really care much for
13 that.

14 Q. And that was in the area that was mining
15 during April 5th?

16 A. Yes, that was at the mouth of the -- well,
17 actually, it's between the headgate and tailgate
18 section, the mouth of the tailgate section.

19 Q. What was the reasoning for putting up
20 doors versus overcast?

21 A. Really, I don't think they gave me a
22 reason, just for time factor. We done most of the
23 work during the Christmas break of 2007, and we
24 only had like a short time to get it all done. It

1 was a time factor.

2 Q. And you said you only had a short time.
3 And that was for what, longwall panel development?

4 A. That was for, yes, that was for actually
5 the whole mine development, because everything
6 moved inby where the overcast was being built,
7 where they needed to be built.

8 Q. Now the doors you're referring to, are
9 they the ones that's currently on this map that's
10 before you? Are any of the doors?

11 A. I never looked. I haven't looked at the
12 map.

13 Yeah, right there. I don't know how to
14 describe that where you can understand it. It's at
15 the mouth of a tailgate panel.

16 Q. I can't see the number. What break is
17 that close to? It's on 6 North Belt around 80,
18 somewhere around 80. Okay. 85, 84.

19 MR. SILKWOOD: Are you talking
20 about these?

21 THE WITNESS: Uh-huh. The two
22 doors.

23 MR. SILKWOOD: Inby it looks like
24 19666 Spaad.

1 THE WITNESS: Spaad number.

2 MS. HAMPTON: And, again, the
3 witness is looking at the longwall map of
4 the Upper Big Branch Mine.

5 MR. KOERBER: And that needs to
6 be marked as Exhibit 3.

7 MS. HAMPTON: Do you want to have
8 him mark with a pen?

9 THE WITNESS: Do you want me to
10 just circle it?

11 MR. O'BRIEN: Just circle it, if
12 you will, please.

13 MS. HAMPTON: So the witness just
14 circled the area with a pink marker.

15 (Hodge Exhibit 3 marked for
16 identification.)

17 BY MR. O'BRIEN:

18 Q. Before that time, before that set of
19 doors, did you have any other doors in the coal
20 mine?

21 A. Yes.

22 Q. Hollis (phonetic) doors?

23 A. Yes, we had a set up on -- well, there was
24 a set coming in the drift about five or six breaks

1 in from the outside. And then when the section was
2 up on what we called the Lower Big Branch, which I
3 don't have a map, we had a set of airlock doors up
4 there.

5 Q. Now were those doors in lieu of overcast
6 or were they for like blowing ventilation purposes?

7 A. No, they were just for holding the
8 pressure.

9 Q. Holding pressure?

10 A. Yes.

11 Q. Let me jump ahead a little bit. When and
12 how did you learn about the explosion on April
13 5th?

14 A. I don't know where I was at. I heard
15 something on the -- I think I heard it on the
16 radio.

17 Q. If I may ask, what was your initial
18 reaction about what happened? Did you have any
19 idea?

20 A. I didn't know what, when they said the
21 mine, had a mine explosion, I didn't have no idea
22 what caused it. I know a lot of people there.

23 Q. Did you ever visit the Upper Big Branch
24 Mine after the explosion?

1 A. No, sir.

2 MR. O'BRIEN: Well, that's all
3 the questions I have right now. I may
4 have some others later, but thank you.

5 THE WITNESS: Yes, sir.

6 EXAMINATION

7 BY MR. GODSEY:

8 Q. When did the longwall leave? I think it
9 went to Logans Fork or something. Do you remember
10 what year it left?

11 A. No, sir, I do not. I wasn't -- I don't
12 know.

13 Q. Had you all had plans on bringing it back
14 to Upper Big Branch, the longwall?

15 A. Yes.

16 Q. And when you were superintendent there,
17 who was responsible, or did you all have anyone
18 responsible or just dedicated to ventilation?

19 A. No, sir, not really. Just me and -- well,
20 me and Bill Harless and, you know, just, and the
21 section bosses.

22 I mean, as far as the outby and stuff,
23 most of the time the midnight took care of a lot of
24 the outby stuff and then me and Bill Harless done a

1 lot of stuff doing, you know, through the shift and
2 what we could.

3 Q. And I think you said that when you were
4 there that 1 North Tailgate was being developed, I
5 believe, and maybe just part of the headgate 1
6 North.

7 A. Yes.

8 Q. Did you have any ventilation problems
9 driving the tailgate or having trouble keeping
10 ventilation there?

11 A. From time to time we did lose, have some
12 air problems, and I can remember, you know, telling
13 them to shut down if they had low air. A couple of
14 times we found a stopping blowed out or crushed
15 out.

16 Q. Did the upper, the over mining in the
17 Powellton seam above you, did it ever give you any
18 concern?

19 A. Not really. I could hear them from time
20 to time, but I never did, I never really thought
21 much about it.

22 Q. Did you ever anticipate any problems when
23 you mined under some of the longwall panels at
24 Logan?

1 A. No. I think most of that had happened, I
2 think, before I ever had got there. I seen a lot
3 of bad ribs and some ribs crushing out, and we had
4 some, a few falls and stuff that we had to take
5 care of. But other than that --

6 Q. Did you look at the overlays where that
7 happened?

8 A. Yes.

9 Q. Did you see any problems?

10 A. No, sir.

11 Q. And you also said that you, when they was
12 developing there that they used the electric
13 doors. What problem did you see by them installing
14 the electric doors instead of an overcast?

15 A. Well, there's always room for human
16 error. You've got people that even though you hang
17 a switch beside the track, they still won't take
18 time to shut the door, you know.

19 Actually, that's about the only thing.
20 That and it just, it was an inconvenient, you know,
21 to me, it's a whole lot better to take your time
22 and go ahead and cut and build the overcasting, you
23 don't have to worry about it.

24 Q. You also stated that you had other doors

1 in there for a track. Did you ever find any of
2 those left open?

3 A. No, I was pretty strict with them on
4 keeping the doors and stuff shut. You know, the
5 doors were put up for a reason.

6 Q. And what system did you all have like
7 during the day or during the evening, whenever they
8 were mining, how often would the section foremen
9 have to call out --

10 A. And I can't remember the exact time, but I
11 know they called out of the mornings when they got
12 started loading, and then they would have to call
13 out by I think it was 10 o'clock that morning and
14 two o'clock in the afternoon, I think. And I'm not
15 really sure about the time. I can't remember. I
16 think that's about right.

17 Q. Who did they even call out to?

18 A. If I was outside, they would talk to me.
19 If not, they would usually talk to the dispatcher
20 or the boy that done the purchasing, Greg Clay.

21 Q. And, in turn, did they have to report to
22 anyone higher than ...?

23 A. Yes, they had to call, to the -- Chris
24 would call and want to know, or they would call

1 Chris and tell him what they had.

2 Q. And you also said before when you first
3 went there as superintendent, you had another
4 individual who was in charge and then they changed
5 over. Did you see this change in the way things
6 were run on a day-to-day basis after it was
7 changed, the people above you?

8 A. I did.

9 Q. What was?

10 A. Really not elaborate on it right now.

11 Q. When you first came there, did anyone ever
12 talk to you about the ignition explosion they had
13 in 1997?

14 A. No, sir. No.

15 Q. Were you ever informed that when the mine
16 reached to maybe over cover that, around a thousand
17 feet or so, that they had problems with methane
18 inundations?

19 A. I never even knowed they had an explosion
20 at the mines before, to be honest with you.

21 MR. KOERBER: I think you're
22 using "explosion" when you mean
23 "inundation."

24 MR. GODSEY: In 1997 they said it

1 was an explosion, slash, inundation. I
2 think that's what the report said.

3 MR. KOERBER: Okay.

4 Q. Did you all have a system, like say a
5 state or a federal inspector come on the property,
6 did you all ever have a system where you all
7 notified underground that they were on the
8 property?

9 A. We didn't have a system. Usually, no
10 matter if it was state or federal or even company
11 people, you know, we would always try to let the
12 section bosses know that they had company coming to
13 the section.

14 Q. How would you do that?

15 A. Just by telling them.

16 Q. Telling they were coming.

17 A. Yes. It wasn't just for state and
18 federal, but for, you know, company people also, if
19 we had anybody show up there.

20 Q. Give me a second. I'll come back in a
21 minute.

22 EXAMINATION

23 BY MR. MCGINLEY:

24 Q. Mr. Hodge, were you familiar with Massey's

1 S1 manual?

2 A. Yes.

3 Q. Did that manual have a requirement with
4 regard to having automatic doors on tracks rather
5 than manually operated doors where there was, you
6 know, involving ventilation, like double airlock
7 doors?

8 A. I think it did say electric doors would be
9 installed or practical or feasible or something. I
10 can't remember the way it was worded.

11 Q. So it wasn't an absolute requirement?

12 A. I don't know of anyone, any mines that had
13 the manual doors up. Was that what you was asking
14 about, manual doors?

15 Q. Yeah.

16 A. I have never used manual doors. The only
17 ones I have ever used has always been electric.

18 Q. Were you familiar with the Massey S1
19 requirement of 20,000 CFM at the last open break on
20 miner sections? Maybe they didn't have it when you
21 were at UBB, but I'm just wondering if you know
22 about it.

23 A. No, I don't. To be honest with you, I
24 don't remember if it was or not, but I don't think

1 so.

2 Q. Do you recall what MSHA's standard was
3 with last open break in terms of --

4 A. I'm thinking it was like 12,000 or 12
5 something.

6 Q. Did you use the S1 manual very often?

7 A. Pretty regular. I mean, I may not
8 remember a whole lot of it now, but I knowed the
9 manual pretty well, you know. And there was some
10 good things in it, there really was.

11 Q. But anything different than, you know,
12 just normal good safety procedures?

13 A. Just common sense mostly.

14 Q. Things that they do at other mines as
15 well?

16 A. Yeah.

17 Q. From the questions that you were asked a
18 few minutes ago, is it fair to say you didn't know
19 that there was a methane ignition in UBB in 1997?

20 A. No, sir, I did not.

21 Q. And is it fair to say you didn't know
22 there was a methane inundation that shut the mine
23 down for a couple of days in 2003, the mine being
24 UBB? You didn't know about that?

1 A. No, sir.

2 Q. And you didn't know about the 2004
3 inundation that also shut the mine down for a
4 couple of days in 2004?

5 A. No, sir.

6 Q. Would you have liked to have known that?

7 A. It probably would have been some good
8 information whenever I was there.

9 Q. Would that have made you be more, more
10 vigilant about ventilation, do you think?

11 A. Well, actually we had, I never had a whole
12 lot of ventilation problems whenever I was there.
13 I know we got on the, the pattern of violations.
14 We was on it for 90 days.

15 But as far as the miner sections go, we
16 normally we had pretty good air on both the miner
17 sections.

18 I know there was times that we would lose
19 air, stoppings would crush out, you know, things
20 happen. But we always took care of it, though, our
21 problems, or tried to. We always tried to take
22 care of our problems.

23 Q. Did you know that there were air reversals
24 at UBB in late 2009, 2010, one of which went on for

1 three weeks?

2 A. No, I didn't know that. No.

3 Q. Would that be a concern?

4 A. I wasn't up there then.

5 Q. Right, I understand. But that would have
6 been a concern if --

7 A. Oh, yeah.

8 Q. -- if you'd known that?

9 A. Air reversal?

10 Q. Yes.

11 A. Shit, that ain't very good.

12 But no, sir, I didn't know that.

13 Q. You did work at UBB at some point when the
14 longwall was operating?

15 A. No, sir.

16 Q. Not before --

17 A. No, sir.

18 Q. Okay.

19 A. No.

20 Q. Would a variation in air readings of 20 or
21 30,000 CFM over one shift, what would that indicate
22 to you?

23 A. Probably a stopping or you've got
24 something down or, you know, an interruption in

1 your ventilation somewhere.

2 Q. And what if that continued for, that
3 change in ventilation continued for two weeks, what
4 would that indicate?

5 A. You're probably out of air. I don't think
6 you -- I don't know many mines that can lose 20,000
7 cubic feet a day for two weeks and still have air.
8 I mean, I really don't.

9 Q. It could be that it's being shifted around
10 to different places in a big mine like UBB?

11 A. Well, there's a problem somewhere.

12 Q. Would it indicate that the approved
13 ventilation plan is not being followed if you had
14 such --

15 A. Yeah.

16 Q. -- significant changes?

17 A. Uh-huh.

18 MR. MCGINLEY: That's all the
19 questions I have for now.

20 MS. HAMPTON: Let's take a break
21 for just a second.

22 (Break.)

23 MR. KOERBER: I'd like to make
24 one real quick statement here.

1 Q. Blanchard?

2 A. Yes.

3 Q. And secondly, why did you leave UBB?

4 A. I was asked to leave because I was sick, I
5 guess.

6 And Jason came up one Saturday about noon
7 and told me that I needed to go to Elk Run on
8 Monday. Well, actually, he told me I need to go
9 down and see Chris Monday morning. He said they
10 was going to bring somebody in to take my place.

11 And I went in to Chris and asked him
12 Monday morning, and he told me, he just said, I
13 need someone to be there every day. Which I never
14 missed any work. I know (b) (7)(C)

15 (b) (7)(C) , but I always just went,
16 whether it was at Charleston or Beckley or whatever
17 and then come back to the coal mines. They can
18 pull my time sheets and look and see how much time
19 I spent at that coal mine, so ...

20 Q. Thank you.

21 A. Yes.

22 EXAMINATION

23 BY MR. GODSEY:

24 Q. Were those doors completed when you were

1 there?

2 A. Yes.

3 Q. Did you ever have any problem with them
4 finding them open or anything?

5 A. No, sir. No, sir, I did not.

6 Q. Did you all have a daily or weekly
7 schedule for rock dusting?

8 A. Yes.

9 Q. How often did you do that?

10 A. Every night on the midnight shift. And
11 then a lot of times we would do it on the day
12 shift, just depending on what the motor crews and
13 different -- it just depended on the schedule and
14 how caught up we was on supplies.

15 Q. Did you have the same thing, did you have
16 a schedule for returns and intakes? How did you
17 handle those?

18 A. The section usually took care of their
19 returns and so far off of a section and then we had
20 machine dusters that we would dust the returns and
21 stuff a lot of times through the day, you know,
22 just put a hose to the door and blowed dust and let
23 air carry it down on the return. And then on the
24 midnight most of the time is when we would do the

1 intakes.

2 Q. Did you all have trickle dusters on the
3 section or anywhere else in the mine?

4 A. We had them at three or four of the
5 heads. And we did have them on, I think, the Lower
6 Branch section when it was still up there, but I
7 don't think we had them up on the tailgate section
8 at the time. I don't believe we did whenever I
9 left. But we did have them at some of the heads,
10 the outby heads, six-foot belts.

11 Q. And up on the Glory Hole, did you have any
12 problems up there with methane or any problems
13 around there?

14 A. Just what would bleed I guess from up here
15 would come down, you know, we would find like one
16 percent or whatever around the Glory Hole.

17 MS. HAMPTON: And you just said
18 "up here" and you pointed to the area
19 where the old abandoned well was that you
20 had mentioned earlier.

21 THE WITNESS: Yes. I'm sorry. I
22 done that again.

23 Q. And did you all use belt air on the
24 sections when you were there for ventilation?

1 Q. Do you know who he is?

2 A. Uh-huh. Actually, he went to mine foreman
3 class whenever I was still there.

4 Q. Do you know how Massey kept track of, or
5 UBB, they kept track of information about the
6 various cards that miners and foremen would have?

7 A. Well, I don't know how they -- I know
8 that -- and there was several of them took their
9 mine foreman class whenever I was there. And we
10 never kept none of the personnel files at the
11 mines. They was all down at the --

12 Q. Marfork?

13 A. No, they was down at the safety
14 department.

15 And when the, whoever, they would pass
16 their test or get their dust cards or whatever it
17 would be and I would tell them to make sure they
18 take their, everything to the safety department so
19 they can get a copy of it and put it in their file,
20 because that's where they kept all the personnel
21 files. We didn't keep none of that at the coal
22 mine.

23 Q. So would that -- you know, we got a bunch
24 of records from the mine.

1 takes a copy or goes down to the safety department
2 and gives them a, so they can get a copy of his
3 card put in his file. That was, you know, typical
4 with everybody that took the mine foreman test or
5 whatever it is, that's what I done.

6 Q. Sure. That makes sense.

7 And there was a card on file, and that was
8 one where, it had his name on it, but the number
9 belonged to somebody that took the exam and
10 actually had the foreman's card, but he worked up
11 in Marion County. And then he was transferred over
12 to Slip Ridge in August --

13 A. That must have been after I left.

14 Q. -- 2009. Yeah, clearly. Yeah, it was.

15 And when he went there, he took a training
16 class and used a different number, and it was the
17 number of (b) (7)(C) .

18 Now we haven't seen any card that he
19 gave.

20 Would Slip Ridge be under the same safety
21 office, do you know?

22 A. No, it would be under Marfork.

23 Q. Okay.

24 A. Yeah. UBB would only use the one down at

1 the safety department.

2 Q. Okay.

3 A. When you come across the bridge there. I
4 don't know if you've ever been up there or not.
5 But it's right there when you cross the bridge,
6 right there on the left.

7 Q. So do you have any idea --

8 A. Why somebody would do something like that?

9 Q. Right. Have you ever heard of that
10 before, somebody using a phony card?

11 A. Yeah, I heard something about some guy
12 done it at I think one of the other mines they had
13 an explosion at. Is that right? Up at --

14 Q. Sago?

15 A. Yeah. Wasn't there somebody up there that
16 was caught doing the same thing?

17 Q. That or maybe a related?

18 A. Yeah. That's pretty dumb on his part is
19 my personal opinion, but it don't really matter my
20 personal --

21 Q. When somebody would come to work at UBB
22 when you were there as a red hat, when would they
23 get their experienced miner training?

24 A. When or how?

1 Q. When is --

2 A. Usually they have to be there for -- well,
3 it just depends on how much -- I think it says six
4 months or 106 hours or something like that, and 106
5 hours.

6 Q. But would they start to get trained --

7 A. Immediately?

8 Q. MSHA has got sort of a little yellow sheet
9 that they have. Was that something that would
10 start immediately?

11 A. We had a sheet, too, that we would fill
12 out as they would, a lot of them would complete one
13 thing and do this and that.

14 Q. So you keep track so that they would --

15 A. Uh-huh.

16 Q. -- go through all the requirements to get
17 their experienced miner card?

18 A. Right.

19 MR. MCGINLEY: I don't have any
20 other questions.

21 MR. KOERBER: Mr. Hodge, I don't
22 know if I said this at the beginning.

23 I'll repeat it anyway.

24 We're telling everybody that,

1 we've interviewed over 250 people, and
2 we're telling everybody that there's a
3 potential we may recall certain people, so
4 I want you to be aware that that's
5 possible with you as well.

6 Also want to allow you at this
7 point in time the opportunity to make any
8 statement, clarify any answer you've
9 given, add anything to anything you would
10 like to add something to. The floor is
11 yours.

12 THE WITNESS: No, I don't think I
13 have got any questions. And as far as I
14 think I have been truthful with you as I
15 can be.

16 MR. KOERBER: Well, we appreciate
17 that.

18 And we also want to thank you for
19 appearing here today.

20 And at this time we'll go off the
21 record.

22 (The interview of RICK HODGE
23 concluded at 2:36 p.m.)
24

1 STATE OF WEST VIRGINIA, To-wit:

2 I, Lisa Marie Short, a Notary Public and
3 Certified Court Reporter within and for the State
4 aforesaid, duly commissioned and qualified, do
5 hereby certify that the interview of RICK HODGE
6 was duly taken by me and before me at the time and
7 place specified in the caption hereof.

8 I do further certify that said proceedings
9 were correctly taken by me in stenotype notes, that
10 the same were accurately transcribed out in full
11 and true record of the testimony given by said
12 witness.

13 I further certify that I am neither
14 attorney or counsel for, nor related to or employed
15 by, any of the parties to the action in which these
16 proceedings were had, and further I am not a
17 relative or employee of any attorney or counsel
18 employed by the parties hereto or financially
19 interested in the action.

20 My commission expires the 8th day of
September 2018.

21 Given under my hand and seal this 11th day
of January 2011.
