

Contact Plan

1. Nobody on the mountain talks on cell phone regardless what is happening.
2. Call Hibbs when the hole is 1850' feet down. Tell David the data will be transmitted in 15 minutes.
3. When hole is breeched, call David Hibbs
4. Let him know "the parts have arrived". — *Drill string trips out com. probe installed w/gas sample line.*
5. After trying to communicate with trapped men
 - a. Indicate number of people alive in mine by saying "we need 1, 2, 3, 4, 5, or 6 gallons of Oil - indicating the number of employees alive.
 - b. If no response - Tell David "truck will not start".
6. Be sure everyone on the mountain knows to NOT report anything.
7. We want to have the ability to tell family members before they find out thru someone else.
8. David Hibbs will contact Bruce Hill immediately when receiving any of these messages. Bruce Hill will contact Rob Moore and MSHA.
9. The family members will be informed immediately.
10. *After family members have been informed ~~Tell~~ drill site "oil is on the way" David Hibbs Tells*
