The operator scheduled underground work for the pump crew consisting of a 3 man crew on 12/24/2009 and 12/25/2009 but did not ensure there was a responsible person at the mine. In the event of an emergency, there must be a person trained in the requirement to respond to the event. The superintendent had knowledge of the work to be performed on these days because he had informed the foreman to call him when they got back out side. He had also placed multi-gas detectors on his desk for the crew.

This would expose miners to the hazards of not having any persons on the surface to respond to emergency underground should an event occur.

This violation is issued in conjunction with 8431838.
