The circuit breaker located in the main control panel of the of the Mixing Car (s/n 53024710020001) can not be set to protect the 3 Hp 480 VAC pump motor. The original breaker had a range of 66-190 amps according to the original electrical schematics. The breaker being used has a range of 90-300 amps. The motor can not be properly protected. This exposes miners to the hazards of fires, electrical shocks and burns from electrical components. The breaker is to be set at 66 amps according to the original schematics. The condition would have existed at the time of the explosion of 4/5/2010.
