The intake air split for the No.1 section which is used as the primary escapeway, with the lifeline miners are to use to escape in fresh air in emergency situations, the air flow has reversed with air flow going outby. In case of an emergency the men on this section would not have fresh air in the primary escapeway. Terry Moore, mine foreman, stated he was aware of this condition and that it has existed for approximately 3 weeks. Mr. Moore engaged in aggravated conduct constituting more than ordinary negligence in that he was aware of the condition. This violation is an unwarrantable failure to comply with a mandatory standard.
