MINE RESCUE TEAM

Fire/Evacuation Record

Date: 10-2-09

Section: Longwall 2nd shift U.B.B.

Escapeway used: Secondary

As required by 30 CFR section 75.1504 the following subjects are to be covered during the quarterly fire and evacuation drills:

- (X) Hands on training with SCSR's used at this mine (SCSR 100) which includes the complete donning, inserting mouthpiece, and transfer of one SCSR to another as well as the maintenance and care of the SCSR.
- (X) One of the approved scenarios included in the Program of Instruction for Firefighting will be utilized each quarter (different one each time).
- (X) Either the primary or secondary escapeway will be traveled in its entirety, alternating the escapeways each quarter.
- (X) Physically locate and practice using the directional lifelines and tethers provided along with physically locating all SCSR storage cache locations in each escapeway.
- (X) Discuss with members the switching of escapeways in the event one becomes blocked and traversing over overcasts and such.
- (X) Review of the mine map and escapeway maps, the firefighting plan and the mine evacuation plan in effect at the mine.
- (X) Operation of the fire suppression equipment available in the mine and the location and use of firefighting equipment and materials.

Person responsible for training (signature) _____ I hereby certify that the above training was conducted with all members who signed the attached page.

Fire Fighting and Evacuation Drill

All under ground mines are required to do a Fire Fighting and Evacuation Drill during the month of October 2009. All persons, including outby persons at the operation is required to participate in this drill.

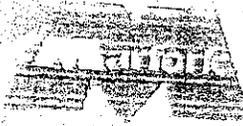

The scenario for this drill will be: While mining in the #1 entry an accidental cut through occurred into an old mine that was not shown on the mine map. This mine had an accumulation of water and possible oxygen deficient atmosphere.

The Primary Escapeway must be traveled during this evacuation.

During this evacuation drill an actual practice of firefighting must be done. This includes hooking up the fire fighting hoses and running water through them, locating fire extinguishers, rock dust and making sure that each person knows what they should do if a fire occurs. A review of the Mine Escape Way Map and the Mine Evacuation and Fire Fighting Program in effect at the mine must be done.

During the evacuation all persons must be included in the evacuation drill, including outby persons. Lifelines, SCSR Caches, Tethers and Shelters must be located during the evacuation. Complete donning and the transfer from one SCSR to another SCSR must be done.

Requirements that must be a recorded are attached to this memo.

Fire/Evacuation Record

Date: 10-30-9
Section Longwall B Crew
Escape way used: Primary
Scenario Used: #1 Entry

As required by 30 CFR section 75.1504 the following subjects are to be covered during the quarterly fire and evacuation drills:

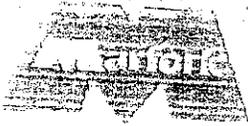

- (X) Hands on training in fire fighting. (Connecting of fire hoses to fire outlets, spraying of water, gathering of fire extinguishers, rock dust and job assignments should a mine fire ever occur.
- (X) Hands on training with SCSR's used at this mine (SCSR 100) which includes the complete donning, inserting mouthpiece, and transfer of one SCSR to another as well as the maintenance and care of the SCSR.
- (X) One of the approved scenarios included in the Program of Instruction for Firefighting will be utilized each quarter (different one each time).
- (X) Either the primary or secondary escapeway will be traveled in its entirety, alternating the escapeways each quarter.
- (X) Physically locate and practice using the directional lifelines, tethers, storage areas for SCSRs and locations of abandoned areas.
- (X) Discuss with members the switching of escapeways in the event one becomes blocked and traversing over overcasts and such.
- (X) A review of the mine map and escapeway maps, the firefighting plan and the mine evacuation plan in effect at the mine.
