Docket: MSHA-2014-0029

Request for Information to Improve the Health and Safety of Miners and to Prevent Accidents in Underground Coal Mines

Comment On: MSHA-2014-0029-0026

Request for Information to Improve the Health and Safety of Miners and to Prevent Accidents in Underground Coal Mines

Document: MSHA-2014-0029-0039

Comment from Jeff Sanders, NA

Submitter Information

Name: Jeff Sanders

Organization: NA

General Comment

1. I defiantly agree about Mine Safety and Health Administration, so it can protect the miners further from any damage. The problems that already exist are small but this regulation will help eliminate those problems.
2. The proposer is well qualified as she is Acting Director, Office of Standards, Regulations, and Variances.
3. It is justified for having in a return to help out miners by aiding them with safety equipment and provide them with a health screen of their body to notify if they have any hazard chemical or particle.
