APR 07 2017

To Whom it may concern:

Rule reference-RIN 1219-AB87

We strongly believe that the implementation of the Workplace Exam Rule should be postponed indefinitely until such time that the rule's status is finalized.

We also believe that that once the final rule's status is determined, compliance assistance from MSHA will be necessary. The compliance assistance should cover, in a more expanded version, working place conditions that may adversely affect safety and prompt notification of miners. Additionally, we believe that MSHA should provide further flexibility and clarification in the recognition of practical work flow and mining conditions.

Thank you for your consideration of the purposed Workplace Exam Rule.
