General Comment

Climate change is ALL WRONG, stop reading comic books BAD for Budget costing American Tax payers Trillions . More Than 650 International Scientists Dissent Over Man-Made Global Warming Claims Scientists Continue to Debunk "Consensus" U.S. Senate Environment and Public Works Committee Minority Staff Report . International Scientists demandedthe UN IPCC "be called to account and cease its deceptive practices," and a canvass of more than 51,000 Canadian scientists revealed 68% disagree that global warming science. Scientists from around the globe challenged man-made global warming claims made by the United Nations Intergovernmental Panel on Climate Change (IPCC) and former Vice President Al Gore. An American Physical Society editor conceded that a "considerable presence" of scientific skeptics exists. An International team of scientists declaring: "Nature, Not Human Activity, Rules the Climate". India Issued a report challenging global warming fears. is "settled." media has take notice of the number of scientists serving as "consensus busters." Skeptical scientists are gaining recognition despite what many say is a bias against them in parts of the scientific community Dr. William M. Briggs, a climate statistician explained that his colleagues described "absolute horror stories of what happened to them when they tried getting papers published that explored non-'consensus' views." In a March 4, 2008, report Briggs described the behavior as "really outrageous and unethical ... on the parts of some editors. "I am a skeptic...Global warming has become a new religion." - Nobel Prize Winner for Physics, Ivar Giaever. Since I am no longer affiliated with any organization nor receiving any funding, I can speak quite frankly....As a scientist I remain skeptical...The main basis of the claim that man's release of

greenhouse gases is the cause of the warming is based almost entirely upon climate models. We all know the frailty of models concerning the air-surface system." - Atmospheric Scientist Dr. Joanne Simpson, Warming fears are the "worst scientific scandal in the history... When people come to know what the truth is, they will feel deceived by science and scientists." - UN IPCC Japanese Scientist Dr. Kiminori Itoh, "The IPCC has actually become a closed circuit; it doesn't listen to others. It doesn't have open minds... I am really amazed that the Nobel Peace Prize has been given on scientifically incorrect conclusions by people who are not geologists." - Indian geologist Dr. Arun D. Ahluwalia at Punjab University "So far, real measurements give no ground for concern about a catastrophic future warming." - Scientist Dr. Jarl R. Ahlbeck, "Anyone who claims that the debate is over and the conclusions are firm has a fundamentally unscientific approach to one of the most momentous issues of our time." - Solar physicist Dr. Pal Brekke, The models and forecasts of the UN IPCC "are incorrect because they only are based on mathematical models and presented results at scenarios that do not include, for example, solar activity." - Victor Manuel Velasco Herrera, a researcher at the Institute of Geophysics "It is a blatant lie put forth in the media that makes it seem there is only a fringe of scientists who don't buy into anthropogenic global warming." - U.S Government Atmospheric Scientist Stanley B. Goldenberg "Even doubling or tripling the amount of carbon dioxide will virtually have little impact, as water vapour and water condensed on particles as clouds dominate the worldwide scene and always will." - . Geoffrey G. Duffy, a professor in the Department of Chemical , it's hard to remain quiet." - Climate statistician Dr. William M. Briggs "Theorists have put the cart before horse. Discussion was one-sided and heavily biased, and the U.N. declared global warming to be a scientific fact," Andrei Kapitsa "Nature's regulatory instrument is water vapor: more carbon dioxide leads to less moisture in the air, keeping the overall GHG content in accord with the necessary balance conditions." - Prominent Hungarian Physicist "For how many years must the planet cool before we begin understand that the planet not warming, how many years must cooling go?" - Geologist Dr. David Gee "Gore prompted me to start delving into the science again and I quickly found myself solidly in the skeptic camp...CANCEL Office of Atmospheric Programs (OAP) office responsible for emission calculations. CANCEL EPA's Office of Transportation Air Quality (OTAQ) involved in calculating emissions CANCEL IPCC who developed Global Warming Potential (GWP) concept. REPEAL 1992 signing United Nations Framework Convention Climate Change (UNFCCC) and 2006 Intergovernmental Panel Climate Change (IPCC) Guidelines National Greenhouse Gas Inventories (IPCC 2006) Implementation 40 CFR Part 98 referred Greenhouse Gas Reporting Program (GHGRP). 40 CFR part 98 cancel Article 4(1)(a) of the United Nations Framework Convention on Climate Change (also identified in Article 12).
