

PUBLIC SUBMISSION

As of: 11/6/17 11:19 AM Received: November 03, 2017 Status: Posted Posted: November 06, 2017 Tracking No. 1k1-8z19-z5sd Comments Due: January 09, 2018 Submission Type: Web
--

Docket: MSHA-2014-0031

Exposure of Underground Miners to Diesel Exhaust

Comment On: MSHA-2014-0031-0076

Exposure of Underground Miners to Diesel Exhaust: Request for Information; Reopening of Rulemaking Record; Extension of Comment Period

Document: MSHA-2014-0031-0100

Comment from a a, NA

Submitter Information

Name: a a

Organization: NA

General Comment

Canadian biologist Dr. Mitchell Taylor is just silly to predict the demise of polar bears. Dr. Sonja Boehmer-Christiansen, climate remains speculative and hypothetical, Chief Meteorologist Mark Scirto expressed climate skepticism Harold Brown, an agricultural scientist mocked global warming fears Dean of Pittsburgh's Graduate School rejected climate fears Meteorologist Kevin Williams is skeptical of man-made climate fears Dr. Richard Courtney, a UN IPCC expert anthropogenic (human-caused) global warming (AGW) is getting weaker and weaker, Aeronautical engineer Roy Clark rejecting man-made global warming fears. Chemist James Hammond, refuted man-made climate fears, Climate Scientist Dr. S. Fred Singer mitigate a natural warming (or cooling) is futile and a big waste of money better spent on real societal problems, Geologist Brian R. Pratt, climate fluctuations and weather patterns as natural phenomena not caused by anthropogenic activities," Atmospheric scientist H. Michael Mogil, warming began as the last ice age waned some 500 years ago, not as humans started to industrialize, Meteorologist Gary Shore carbon dioxide sort of fertilize the air and does that create more plants which in turn digest more carbon dioxide and create more oxygen . Climate scientist Dr. Dick Morgan rejected man-made climate fears, As the IPCC does not have an adequate representation of oceanographers and solar scientists in its WG1 (Working Group 1) and [IPCC] Panel, it is not representative of the total scientific forum of experts in climate change integers, Climate scientist Dr. David Douglass inescapable conclusion is that the human contribution is not significant, Berkeley University- and MIT-educated scientist Jeffrey P. Schaffer; Gore's claims of a "20-foot sea level rise due to rapid melting of the Greenland ice

sheet is far from reality, A perceived crisis really boosts your environmental organizations membership! climatologist Stephen Schneider: 'We need to get some broad-based support to capture the public's imagination. Meteorologist Morgan Palmer. Any idea can become mainstream if you just hear one side of the argument, Folks that are writing these papers that a lot of institutions are going after grant money, Engineer David Holland the UN IPCC process. "[Climate science] is by all measures as important a field of research as medicine, and ought to operate to standards at least as high, but it does not. On the contrary, it is steeped in bias, concealment and spin, Chemist Dr. Daniel W. Miles even if the carbon dioxide concentration in the air were doubled, its greenhouse effect would be canceled by a mere one percent rise in cloudiness. Geologists Dr. George Chilingar; arming temperatures were due to natural factors, not mankind. Aeronautical engineer Bob Edleman There is no consensus. Even if there were it would have no value in science. Proof leads to consensus, not the other way around. Environmental expert Sergei Golubchikov, "Humanity is focusing environmental efforts on the boogeyman of global warming," Anxiety over climate change is carried too far, to my mind, Anxiety easily turns to panic, forcing the world into hasty, and possibly wrong, steps, Kyoto Protocol, was ratified even before the link between global warming and the concentration of carbon dioxide in the atmosphere had been proved, Atmospheric scientist Dr. Chris Walcek a recent committee of scientists concluded that there isn't a strong correlation between climate change and hurricane intensity . Air resources engineer Tom Scheffelin the quasi-religious fervor surrounding global warming." He explained, "Cyclic global warming is normal and must occur no matter what anyone does or does not do Carbon dioxide has no direct role in global warming. Physicist Dr. Henrik Svensmark ; planet is experiencing a natural period of low cloud cover due to fewer cosmic rays entering the atmosphere. Scientists Lin Zhen-Shan's and Sun Xian's Chinese Scientists Say C02 Impact on Warming May Be 'Excessively Exaggerated' - Gwyn Prins of the London School of Economics; calling on the UN to "radically rethink climate policy, Kyoto Protocol was always the wrong tool for the nature of the job. Chief Meteorologist Karl Spring of Duluth ; Gore "takes facts and extrapolates them to such extremes," and he projects "a doomsday scenario. We need to be careful about where we get our information on global warming, and this debate unfortunately is driven by politicians." Alexandre Amaral de Aguiar, Gore forecasts earlier predictions made by him are already proving to be an inconvenient mistake, Horticulturalist Alan Titchmarch rejected fears of warming induced species loss. "We'll lose some, we'll gain others. Wildlife is remarkably tenacious. Nature always copes, Geologist C. Robert Shoup The hypothesis of Anthropogenic Global Warming does not yet meet the basic scientific standards of proof needed to be accepted as a viable hypothesis, much less as accepted fact
