## General Comment

The Mining Coalition, a group of companies that operate or service metal and non-metal mines, supports MSHA's proposed extension of the effective date of the referenced changes to the workplace examination rule. The extension is necessary to permit review, revision and deletion of counterproductive provisions of the changes, that MSHA agrees have no quantifiable safety benefits. Additional Coalition comments will be provided at the upcoming public hearings.

Sincerely,

The Husch Blackwell Safety Law Defense Team, Representing The Mining Coalition:
