We are a small family business with 3 locations. It's all we can do just to keep up with current regulations. There is nothing wrong with the current system , don't make it worse. Don't make president Trump veto another unnecessary regulation. You'll never be able to regulate ignorance . If a miner wants to be irresponsible, he will and no amount of regs will change that. If you want REAL change , make the miner responsible for there own actions .
