Subject: MSHA RFI on silica - ANSI standard

Hi,

Quick question related to the ANSI Z88.2 standard referenced in the silica RFI.

On page 41 FR 45455, MSHA seeks comment on the 2015 ANSI Z88.2 standard and states that the standard is in the docket. However, today looking in the docket, there are no supporting documents. Could you please clarify how this document can be accessed so we can provide comment if necessary?

Thank you!
