Electronic submission to zzMSHA-comments@dol.gov

Dear Ms. Noe:

Re: Extension Request to Comment Period for Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection, RIN 1219-AB36, Docket No. MSHA-2023-0001
Continental Cement respectfully requests a 60-day extension to the comment period for the proposed rule (PR), "Lowering Miners' Exposure to Respirable Crystalline Silica and Improving Respiratory Protection." Continental Cement operates cement manufacturing facilities and other operations that will be directly affected by the rule. Extending the comment period will give additional time to study and understand the PR and how it affects our employees and operations.
Continental Cement is aware of and concurs with the reasons stated in the extension request filed by the Portland Cement Association.
Thank you,

Bill Bradshaw
Director of Safety
Continental Cement
