

1.0 PURPOSE

The purpose of this Policy (POL) is to provide the governing policy on waiver of External Surface Temperature Tests.

2.0 SCOPE

This POL encompasses enclosures and motors submitted to MSHA for evaluation under 30 CFR, Part 18.

3.0 REFERENCES

30 CFR 18.23

4.0 DEFINITIONS

N/A

5.0 POLICY

The Electrical Safety Division reserves the right to waive external surface temperature tests when manufacturers who have conducted internal surface temperature tests provide a description of their test procedures, a list of instrumentation used for their tests, and test results. An analysis will be made of the manufacturer's submitted data and a determination will be made if further tests are required.
